new/usr/src/uts/common/brand/lx/procfs/lx_prvnops.c

OS-5083 lx_proc /proc/swaps needs to try harder

unchanged portion omitted

```
3896 /*
3897  * lxpr_read_swaps():
3898  *
3899  * We don't support swap files or partitions, but some programs like to look
3900  * here just to check we have some swap on the system, so we lie and show
3901  * our entire swap cap as one swap partition.
3902  *
3903  * It is important to use formatting identical to the Linux implementation
3904  * so that consumers do not break. See swap_show() in mm/swapfile.c.
3905  */
3906 /* ARGSUSED */
